

Fullriver DC

The Deep-cycle AGM battery.

Maintenance-free

Applications:

Cleaning machines
Elevating platforms
Golf carts and caddies
Horticulture
Leisure vehicles
Shipping

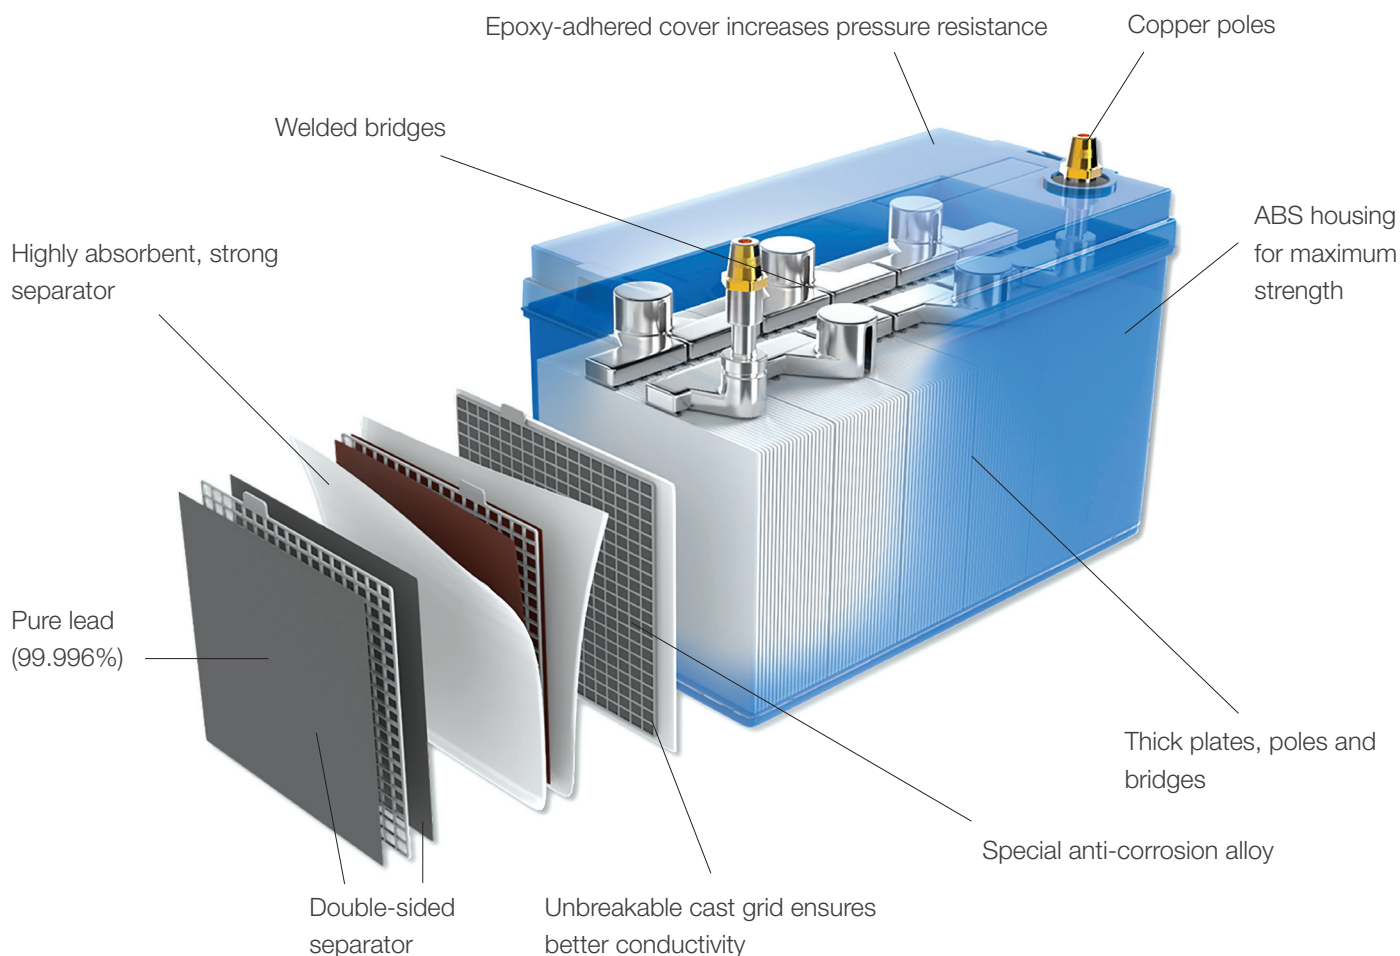

Fullriver DC batteries are the smart choice for demanding applications in both leisure and industrial environments. The DC series offers the performance and life span that you would expect of a Deep-cycle battery, and this combined with the convenience of a maintenance-free battery. An additional advantage of these AGM batteries is that you can insert them in any position, except upside down.

Advantages Fullriver DC

- Immediately available from stock
- Maintenance-free, clean and safe energy
- AGM technology
- 600 cycles
- Available as 6, 8 and 12V
- Ideal for intensive use
- Very extensive range
- Highly reliable and premium quality
- Standard 18-month guarantee

What makes the Fullriver DC a premium AGM battery?

- Positive and negative lead paste contains additives to extend the life span
- Welded bridges: the cell connector is not affected by vibrations or shocks
- High temperature treatment ensures a longer life span

- (DC series), medium temperature treatment results in higher performance (HC series)
- Copper pole connections mean less interference than lead pole connections

Recycling

Did you know that 98% of all lead acid batteries can be recycled? Traditional lead acid batteries also boast the highest collection percentage of all types of batteries.
